Meet this HANDSOME HUNK OF LOVE...LOKI!! He is 7 years young, fully vetted, house broken, and missing his cozy home life setting. Were told he was good with children (he's over 120 lbs.) so use caution with littles because he could accidentally knock over. Wants to be the "Prince of the home" ...no other pets and an owner that will keep him away from other animals when outside. Give Loki back the life he deserves and is missing!

MARGARET! This girlie is the SWEETEST!! All she wants is for you to rub and love on her and to love you in return. Just a loyal 8 and a half years old lady who is current on shots, spayed, and deserving of a fabulous life with a loving person or family. Maybe you have the most perfect FOREVER home for beautiful Margaret?!

March Into Spring

Spring is coming and along with the warmer weather also comes puppies and kittens to the shelter. Hopefully people will be adding one of the shelter animals to their household in the near future. Training from the beginning is very important whether it is a puppy or ongoing training for an older adopted pet. Any time your pet, new or old, displays a behavior you wish to continue be sure to reward the behavior with your attention and some type of positive reinforcement. This reinforcement can be some extra attention, a pat on the head, a belly rub or some of their favorite treats. Be careful with the treats though or you will wind up with a well-trained but FAT pet.
